Why you should attend.

The value of this training is an integral part of the Preparedness Directorate (HSPD 8) as outlined in the Presidential paper and consistent with the methodology of FEMA/NPD/NIC/TEI as a certified curriculum. It provides not only the first line of **emergency responder disciplines** with the necessary methodology as site-specific in your jurisdiction, but for all those ancillary resources and entities in your jurisdiction (**public schools, CERT, ARC, universities, private sector businesses, major sporting venues, others as determined by the jurisdiction**).

The methodology as presented in the curriculum, in keeping with the all-hazards impetus of the NRF and the Stafford Act, is:

- Conduct a Threat Assessment
- Conduct a Vulnerability Assessment
- Determine Planning Factors (casualties, both evac and fatalities)
- Conduct Capabilities-based Planning Assessment, and
- Conduct a Needs Assessment

Additionally, discipline/entity "networking" is accomplished over the three-day class and participants, divided into teams, work through the process utilizing their expertise and professional knowledge, skills, and abilities: contributions from those present in performing the tabletops validates the comprehensive, thorough, and precise assessments.
